

I love being a flight attendant & safety professional! Cell Phone Concerns; 1.No one ever talks softly! (I have a hard enough time hearing drink orders over the engines)2.Not everyone stops talking during the safety demo. Aircraft safety would be compromised 3.A large majority of passengers either sleep, do work, or listen quietly 2 music useing a headset. Quiet is a courtesy & needs to be respected & enforced! PLZ, NO CELL PHONES IN FLIGHT! Kit May
